

ÇİMSTONE®
quartz surfaces

2021

The generic
brand of Turkey

ÇİMSSTONE®

Çimstone, which started its activities in 1996, is one of the leading quartz surface material manufacturers of the world. Çimstone has become the founding brand of the sector with its products, which have not been known in Turkey back in those days and which have brought many advantages to the architecture and decoration sectors, and since those days, quartz surface coating materials have been known as “Çimstone” in Turkey.

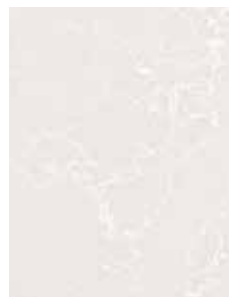

B r a n d n e w f o r 2 5 y e a r s

As the brand that gives its name to a sector, we have been determining product quality, diversity and aesthetic trends since the end of the 90's. As Çimstone, we demonstrate our belief in our country and the sector by continuing our investments and commercial activities under all circumstances. We represent our latest products with brand new colours and pattern options through our newly commissioned second production line that is equipped with the state-of-the-art Breton technology.

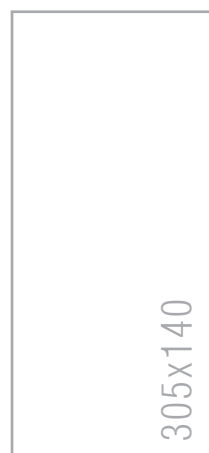

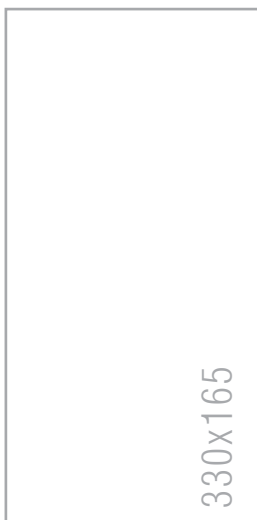

Çimstone is ready to add value to your living areas with its functional and elegant options, just as it has been doing for more than 25 years.

The climax of the technology Our new production line

The production power, which constitutes Çimstone quality, is based on Breton technology. Çimstone carries out its production in two separate production lines in 305 x 140 cm, 310x152 cm and 330x165 cm slabs sizes.

With our second production line, which we commissioned at the beginning of 2020, we brought the state-of-the-art Breton technology to our country. With our new production line, which brings uninterrupted solutions for space design by making it possible to produce larger slabs, we have made innovations in terms of both colour and pattern in our product collection.

Uninterrupted solutions for space design
thanks to production of larger slabs
